

SOLUTION MANUAL

Financial Accounting

IFRS Edition – 3rd

Jerry J. Weygandt, Paul D. Kimmel, Donald E. Kieso

Chapter - 5

Accounting for Merchandising Operations

ANSWERS TO QUESTIONS

1. (a) Disagree. The steps in the accounting cycle are the same for both a merchandising company and a service company.
 (b) The measurement of income is conceptually the same. In both types of companies, net income (or loss) results from the matching of expenses with revenues.

LO: 5.4

Difficulty: Easy

BLOOMCODE: Comprehension

AACSB: Reflective thinking

2. The normal operating cycle for a merchandising company is likely to be longer than in a service company because inventory must first be purchased and sold, and then the receivables must be collected.

LO: 5.1

Difficulty: Easy

BLOOMCODE: Knowledge

AACSB: Reflective thinking

3. (a) The components of revenues and expenses differ as follows:

	Merchandising	Service
Revenues	Sales	Fees, Rents, etc.
Expenses	Cost of Goods Sold and Operating	Operating (only)

- (b) The income measurement process is as follows:

LO: 5.1

Difficulty: Easy

BLOOMCODE: Comprehension

AACSB: Reflective thinking

4. Income measurement for a merchandising company differs from a service company as follows:
 (a) sales are the primary source of revenue and (b) expenses are divided into two main categories: cost of goods sold and operating expenses.

LO: 5.1

Difficulty: Easy

BLOOMCODE: Comprehension

AACSB: Reflective thinking

5. In a perpetual inventory system, cost of goods sold is determined each time a sale occurs.

LO: 5.3

Difficulty: Easy

BLOOMCODE: Knowledge
AACSB: Reflective thinking

6. The letters FOB mean Free on Board. FOB shipping point means that goods are placed free on board the carrier by the seller. The buyer then pays the freight and debits Inventory. FOB destination means that the goods are placed free on board to the buyer's place of business. Thus, the seller pays the freight and debits Freight-out.

LO: 5.2
Difficulty: Easy
BLOOMCODE: Comprehension
AACSB: Reflective thinking

7. Credit terms of 2/10, n/30 mean that a 2% cash discount may be taken if payment is made within 10 days of the invoice date; otherwise, the invoice price, less any returns, is due 30 days from the invoice date.

LO: 5.2
Difficulty: Easy
BLOOMCODE: Comprehension
AACSB: Reflective thinking

8. July 24 Accounts Payable (£2,500 – £200) 2,300
 Inventory (£2,300 X 2%)..... 46
 Cash (£2,300 – £46)..... 2,254

LO: 5.2
Difficulty: Medium
BLOOMCODE: Application
AACSB: Analytic

9. Agree. In accordance with the revenue recognition principle, companies record sales revenue when the performance obligation is satisfied. The performance obligation is satisfied when the goods transfer from the seller to the buyer; that is, when the exchange transaction occurs. The earning of revenue is not dependent on the collection of credit sales.

LO: 5.3
Difficulty: Easy
BLOOMCODE: Analysis
AACSB: Analytic

10. (a) The primary source documents are: (1) cash sales—cash register tapes and (2) credit sales—sales invoice.

Questions Chapter 5 (Continued)

- (b) The entries are:

		<u>Debit</u>	<u>Credit</u>
Cash sales—	Cash	XX	
	Sales Revenue		XX
	Cost of Goods Sold	XX	
	Inventory		XX

Credit sales—	Accounts Receivable	XX	
	Sales Revenue.....		XX
	Cost of Goods Sold.....	XX	
	Inventory.....		XX

BRIEF EXERCISE 5-8

The format of an income statement for a merchandising company is designed to differentiate between various sources of income and expense.

Item	Section
(a) Gain on sale of equipment	Other income and expense
(b) Interest expense	After other income and expenses
(c) Casualty loss from vandalism	Other income and expense
(d) Cost of goods sold	Cost of goods sold
(e) Depreciation expense	Operating expenses

LO: 5.5

Difficulty: Easy

BLOOMCODE: Comprehension

AACSB: Reflective thinking

BRIEF EXERCISE 5-9

- (a) Net sales = €506,000 – €13,000 = €493,000.
- (b) Gross profit = €493,000 – €342,000 = €151,000.
- (c) Income from operations = €151,000 – €110,000 = €41,000.
- (d) Gross profit rate = €151,000 ÷ €493,000 = 30.6%.

EXERCISE 5-12

- (a) $\text{£}860,000 - \text{£}533,200 = \text{£}326,800$.
- (b) $\text{£}326,800 / \text{£}860,000 = 38\%$. The gross profit rate is generally considered to be more useful than the gross profit amount. The rate expresses a more meaningful (qualitative) relationship between net sales and gross profit. The gross profit rate indicates what portion of each sales dollar goes to gross profit. The trend of the gross profit rate is closely watched by financial statement users, and is compared with rates of competitors and with industry averages. Such comparisons provide information about the effectiveness of a company's purchasing function and the soundness of its pricing policies.
- (c) Income from operations is $\text{£}105,800$ ($\text{£}326,800 - \text{£}221,000$), and net income is $\text{£}98,800$ ($\text{£}105,800 - \text{£}7,000$).
- (d) Inventory is reported as a current asset immediately below prepaid expenses.

Plus: Purchases	141,000	150,000	132,000
Less: Payments to suppliers	<u>135,000</u>	<u>161,000</u>	<u>127,000</u>
Ending accounts payable	<u>€ 26,000</u>	<u>€ 15,000</u>	<u>€ 20,000</u>

(d) Gross profit rate

¹ 36.8%	² 39.0%	³ 42.8%
$\frac{^1€83,000}{€225,700} \div$	$\frac{^2€93,700}{€240,300} \div$	$\frac{^3€100,500}{€235,000} \div$

No. Even though sales declined in 2017 from the prior year, the gross profit rate increased. This means that cost of goods sold declined more than sales did, reflecting better purchasing power or control of costs. Therefore, in spite of declining sales, profitability, as measured by the gross profit rate, actually improved.

*PROBLEM 5-6B

- (a) (a) **Cost of goods sold = Sales – Gross profit**
= £53,000 – £38,300 = £14,700
- (b) **Net income = Gross profit – Operating expenses**
= £38,300 – £35,900 = £2,400
- (c) **Inventory = 2014 Inventory + Purchases – CGS**
= £7,200 + £14,200 – £14,700 = £6,700
- (d) **Cash payments to suppliers = 2014 Accounts payable +**
Purchases – 2015 Accounts payable
= £3,200 + £14,200 – £3,400 = £14,000
- (e) **Sales revenue = Cost of goods sold + Gross profit**
= £13,800 + £35,200 = £49,000
- (f) **Operating expenses = Gross profit – Net income**
= £35,200 – £2,500 = £32,700
- (g) **2015 Inventory + Purchases – 2016 Inventory = CGS**
Purchases = CGS – 2015 Inventory + 2016 Inventory
= £13,800 – £6,700 [from (c)] + £8,100
= £15,200
- (h) **Cash payments to suppliers = 2015 Accounts payable +**
Purchases – 2016 Accounts Payable
= £3,400 + £15,200 [from (g)] –
£2,500
= £16,100
- (i) **Gross profit = Sales – CGS**
= £46,000 – £14,300 = £31,700
- (j) **Net income = Gross profit – Operating expenses**
= £31,700 [from (i)] – £28,600 = £3,100
- (k) **2016 Inventory + Purchases – 2017 Inventory = CGS**
Inventory = 2016 Inventory + Purchases – CGS
= £8,100 + £13,200 – £14,300 = £7,000
- (l) **Accounts payable = 2016 Accounts payable +**
Purchases – Cash payments
= £2,500 + £13,200 – £13,600 = £2,100

***PROBLEM 5-6B (Continued)**

- (b) A decline in sales does not necessarily mean that profitability declined. Profitability is affected by sales, cost of goods sold, and operating expenses. If cost of goods sold or operating expenses decline more than sales, profitability can increase even when sales decline. In this particular case, the sales decline was offset by cost savings to improve profitability. Therefore, profitability increased for Psang Ltd. from 2015 to 2017.

	2015	2016	2017
Gross profit rate	$\$38,300 \div \$53,000$ = 72.3%	$\$35,200 \div \$49,000$ = 71.8%	$\$31,700 \div \$46,000$ = 68.9%
Profit margin ratio	$\$2,400 \div \$53,000$ = 4.5%	$\$2,500 \div \$49,000$ = 5.1%	$\$3,100 \div \$46,000$ = 6.7%

(a) Responses to Mei-ling questions

1. The mixers should be classified as inventory as they are for resale.
2. A perpetual inventory system will provide better control over inventory. Because you are dealing with high-value items you should use the perpetual system.
3. You still need to count inventory to ensure that your records are accurate and that the inventory that is supposed to be on hand is actually there. I suggest you should count the inventory once a month.

(2) Percentage change in net income: (NT\$183,849.7 – NT\$159,286.4) ÷ NT\$159,286.4		15.4% increase
(b) Gross profit rate: NT\$244,127.8 ÷ NT\$506,745.3 NT\$281,360.8 ÷ NT\$597,024.2	48.2%	47.1%
(c) Percentage of net income to sales: NT\$159,286.4 ÷ NT\$506,745.3 NT\$183,849.7 ÷ NT\$597,024.2	31.4%	30.8%

Comment

The percentage of net income to sales decreased 1.9% from 2012 to 2013 (31.4% to 30.8%). The gross profit rate decreased 2.2% during this time. (48.2% to 47.1%)

This indicates the company did a slightly better job of controlling operating expenses in 2012 than in 2013.

(2)

FAMILY DEPARTMENT STORE, LTD.
Income Statement
For the Year Ended December 31, 2017

Net sales		£700,000
Cost of goods sold		<u>553,000</u>
Gross profit		147,000
Operating expenses		
Selling expenses	£72,000*	
Administrative expenses	<u>20,000</u>	<u>92,000</u>
Net income		<u>£ 55,000</u>

* $£100,000 - £30,000 + (£700,000 \times 2\%) - (£30,000 \times 40\%) = £72,000$.

- (b) Debbie's proposed changes will increase net income by £29,400. Mike's proposed changes will reduce operating expenses by £28,000 and result in a corresponding increase in net income. Thus, if the choice is between Debbie's plan and Mike's plan, Debbie's plan should be adopted. While Mike's plan will increase net income, it may also have an adverse effect on sales personnel. Under Mike's plan, sales personnel will be taking a cut of £16,000 in compensation [$£60,000 - (£30,000 + £14,000)$].

BYP 5-3 (Continued)**(c)**

FAMILY DEPARTMENT STORE, LTD.
Income Statement
For the Year Ended December 31, 2017

Net sales.....		£735,000
Cost of goods sold.....		<u>558,600</u>
Gross profit.....		176,400
Operating expenses		
Selling expenses	£72,700*	
Administrative expenses	<u>20,000</u>	
Total operating expenses		<u>92,700</u>
Net income		<u>£ 83,700</u>

***£72,000 + [2% X (£735,000 – £700,000)] = £72,700.**

If both plans are implemented, net income will be £56,700 (£83,700 – £27,000) higher than the 2016 results. This is an increase of over 200%. Given the size of the increase, Mike’s plan to compensate sales personnel might be modified so that they would not have to take a pay cut. For example, if sales commissions were 3%, the compensation cut would be reduced to £8,650 [£16,000 (from (b)) – £735,000 X (3% – 2%)].

(a), (b)

**President
Boardin Co.**

Dear Sir:

As you know, the financial statements for Boardin Co. are prepared in accordance with IFRS. One of these principles is the revenue recognition principle, which provides that revenues should be recognized when the performance obligation is satisfied.

Typically, sales revenues are recognized when the goods are transferred to the buyer from the seller. At this point, the sales transaction is completed and the sales price is established. Thus, in the typical situation, revenue on the surfboard ordered by Dexter is earned at event No. 8, when Dexter picks up the surfboard.

The circumstances pertaining to this sale may seem to you to be atypical because Dexter has ordered a specific kind of surfboard. From an accounting standpoint, this would be true only if you could not reasonably expect to sell this surfboard to another customer. In such case, it would be proper under IFRS to recognize sales revenue when you have completed the surfboard for Dexter.

Whether Dexter makes a down payment with the purchase order is irrelevant in recognizing sales revenue because at this time, the performance obligation has not been satisfied. A down payment may be an indication of Dexter's "good faith." However, its effect on your financial statements is limited entirely to recognizing the down payment as unearned revenue.

If you have further questions about the accounting for this sale, please let me know.

Sincerely,

- (a) Anita Zurbrugg, as a new employee, is placed in a position of responsibility and is pressured by her supervisor to continue an unethical practice previously performed by him. The unethical practice is taking undeserved cash discounts. Her dilemma is either follow her boss's unethical instructions or offend her boss and maybe lose the job she just assumed.
- (b) The stakeholders (affected parties) are:
- Anita Zurbrugg, the assistant treasurer.
 - Chris Dadian, the treasurer.
 - Yorktown Stores, the company.
 - Creditors of Yorktown Stores (suppliers).
 - Mail room employees (those assigned the blame).
- (c) Anita's alternatives:
1. Tell the treasurer (her boss) that she will attempt to take every allowable cash discount by preparing and mailing checks within the discount period—the ethical thing to do. This will offend her boss and may jeopardize her continued employment.
 2. Join the team and continue the unethical practice of taking undeserved cash discounts.
 3. Go over her boss's head and take the chance of receiving just and reasonable treatment from an officer superior to Chris. The company may not condone this practice. Anita definitely has a choice, but probably not without consequence. To continue the practice is definitely unethical. If Anita submits to this request, she may be asked to perform other unethical tasks. If Anita stands her ground and refuses to participate in this unethical practice, she probably won't be asked to do other unethical things—if she isn't fired. Maybe nobody has ever challenged Chris's unethical behavior and his reaction may be one of respect rather than anger and retribution. Being ethically compromised is no way to start a new job.

GAAP EXERCISES

GAAP 5-1

Expenses may be classified by “nature” or by “function”. The “nature-of-expense” classification organizes expenses by type of expense, such as salaries, depreciation, rent, or supplies. The “function-of-expense” classification presents expenses by type of business activity. Examples would include cost of goods sold, selling, administrative, operating, and non-operating.
